

NASA LAUNCH PAD

HELICAL PILES

PROJECT DESCRIPTION:

Project Name:

NASA Launch Pad

Date:

March 2012

Location:

Fort Lauderdale, FL

Project Type:

Helical Piles

Installer:

Brownie Companies

Foundation Engineer:

Jones Edmunds

Pile Engineer:

Magnum - Geo Solutions

Description:

Installed 113 MH325BR helical piles to an ultimate capacity of 90,000 lbs. The piles were installed through a very stiff upper layer and required pre-drilling to a depth of approximately 20 ft to install the piles to a target depth of 30 ft. The piles were tension tested and achieved the necessary capacities.
