Magnum's New Building

We are proud to unveil our new building in Cincinnati, OH. At 100,000 square feet and sitting on a nine acre lot, our new building has new corporate offices, and a new showroom for hosting seminars and customer training events. It also provides us with increased manufacturing capabilities with the addition of state of the art equipment such as laser cutting, robotic welding, and HD plasma cutting.

Magnum Attends Fluor "Golf for Greater Houston" Charity Event

Magnum Piering was a proud Eagle sponsor of Fluor Corporation's "Golf for Greater Houston" annual charity event. We hit the course with some fine folks from Fluor Corporation and Cajun Industries, LLC and had a great time. We are grateful to Fluor for putting on such a great event that will have a positive impact on the community.

Case History: 5th and Buckeye

Waldo Excavation installed 535 Magnum MH-425 helical piles for the foundation of a large warehouse and an office building for the municipality. Helical piles were chosen for this project for several reasons. The site contained contaminated soil, and utilizing helicals allowed Waldo to save on the cost of hauling soil away.
