

## Spring 2020 Deep Foundations Report

Our hearts and prayers go out to those that have been adversely affected by COVID19. We would also like to acknowledge the brave first responders, medical professionals and everyday people showing dedication and acts of kindness that are helping us get through the current health crisis.

All of us at MAGNUM are taking precautions to protect our valued staff and their families so that we may get through this together. We will see this through so that we may continue to serve the foundation industry.

*-BJ Dwyer, VP Magnum Piering*

### Displacement Piles are here

Magnitude® Grouted piles all involve displacing soil and creating a reinforced grout column. These piles can often achieve comparable capacity and performance of drilled displacement piles of similar diameter and depth.

---

**“Obstructions hinder our path and cause us to change course. They deter us from our routine of normalcy. The resilience and perseverance to circumvent obstructions defines us and our journey.**

Focusing on the obstruction will only cause you to hit it. Look Past it. Move forward, and we will meet on the other side.”
