**MAGNUM**  
PIERING  
designed to support

## Expanding Our Foundation

11/8/2023

MAGNUM®'s growth plan has been moving at a rapid rate since 2017 when it moved into its 100,000 sq ft manufacturing facility located in Cincinnati, Ohio. MAGNUM® continues to invest in the expansion plan by adding valuable team members, automation equipment, manufacturing space and other initiatives to allow us to stay innovative and support our clients needs. We are excited to announce that we started construction on the addition of our current facility. This addition will add approximately 10,000 square feet of manufacturing space as well as more space in our lot to allow us to add more automation equipment and inventory space.

MAGNUM® is very grateful for our customers and the many successful projects we have completed together. We value our commitments to serving you with the best quality and customer service in the industry and we are confident this expansion will allow us to do just that!"

*"Meeting customer deadlines with quality products is always our first priority. This new expansion shows how dedicated to this priority we are."*

- BJ Dwyer, VP Sales

*"The new space will allow Magnum Piering to advance our cutting-edge fabrication equipment to better service our customers."*

- Todd Paddock, VP Manufacturing
