## Knapheide Expansion Illinois Chicago

Knapheide Truck Equipment Center in Chicago was expanding their inventory and their facility. Reinforcement of their existing structure and new structure was needed to accommodate additional equipment. Equipment such as cranes. Magnum Geo Solutions oversaw the engineering for this project. 122 MH325BR piles were installed outside and inside of the facility to increase the foundation capacity. Slabjack was contacted to provide the equipment for this project.

### **(122) MH325BR Set to depth of 30 Feet**
