Description: MAGNUM® Bond Bar Cap consist of a collar tube with bolt hole for connection to MAGNUM® helical piles and vertical reinforcing steel bars for embedment in cast-in-place reinforced concrete. MAGNUM® products are manufactured in the USA according to our ISO 9001 approved quality program. Structural capacities are developed according to AISC 360 and ACI 318 considering an average design life of 75 years for bare steel in most soil conditions. Hot-dip galvanizing is available upon request. Design and detailing of the structure to which bearing plate cap is embedded in varies by project and is the responsibility of the registered design professional.
